WHY PSET?

Built for What's Next

PSET UNI and PSET TVET are built on the same intelligent ecosystem, connecting institutions through one unified platform designed for both academic and vocational education.

- ▲ **INTEGRATED ECOSYSTEM**
Connect NSFAS and national funders through one integrated platform.
- ▲ **AI FIRST BY DESIGN**
Embedded AI automates processes and supports smarter decision-making.
- ▲ **DECISIONS-DRIVEN DATA**
Access real-time insights with powerful dashboards and reporting.
- ▲ **BUILT BY SECTOR EXPERTS**
Developed by experts with decades of higher education experience.

Built for universities that need to manage complex academic, research and institutional operations in one place. PSET UNI connects administration, postgraduate management, research, planning and governance to help teams work more efficiently.

Streamlined ERP for TVET colleges focused on teaching excellence, student success and industry relevance. PSET TVET brings the day-to-day needs of colleges into one connected platform, helping institutions stay organised and focused on student success.

ONE PSET. A SHARED FOUNDATION.

Student Lifecycle	Financial Management	Human Resources Management	Governance, Risk & Compliance
Asset & Facilities Management	Supply Chain Management	Customer Engagement	Reporting & AI

Universities

Built for complex academic and research operations

Designed for universities that require advanced academic administration, postgraduate management, research, governance, planning and enterprise-wide integration.

Built Around Essentials

- ▲ Undergraduate and postgraduate administration
- ▲ Research and HEMIS management
- ▲ Institutional planning and governance
- ▲ Enterprise integrations and analytics

Core Capabilities

Academic Administration

Manage applications, admissions, registrations, programmes, curricula and academic records.

Postgraduate & Research

Oversee postgraduate journeys, research projects, outputs and supervisor milestones.

Planning & Performance

Plan strategically, track performance and drive institutional excellence.

Governance & Reporting

Strengthen governance with risk, compliance and committee reporting.

TVET Colleges

Built for technical and vocational education and student success

Designed for TVET colleges that need streamlined administration, workplace learning, multi-campus operations and simplified, industry-standard compliance reporting.

Built Around Essentials

- ▲ NC(V), NATED & Occupational Programme Management
- ▲ Teaching & Learning Coordination
- ▲ Work-integrated learning (WIL)
- ▲ DHET and NSFAS reporting

Core Capabilities

Teaching & Learning Operations

Manage timetables, classes, lecturers and assessments.

Student Lifecycle

Recruit, register and support students through every step of their journey.

Student Support & Success

Identify at-risk students, manage cases and drive positive interventions.

Workplace & industry readiness

Track placements, WIL and industry partnerships with ease.

Student Lifecycle

When every stage of the student journey is connected, every student has a greater opportunity to succeed.

KEY CAPABILITIES

Admissions & Registration

Manage applications, admissions, enrolment, and student records from a single platform.

Academic Administration

Coordinate programmes, modules, assessments, progression, and academic records with ease.

Student Finance

Manage billing, payments, sponsorships, bursaries, and student account information.

Campus Services

Provide integrated timetabling, shuttle bookings, meal management, and student support services.

Research & Graduation

Support research administration while simplifying graduation planning and ceremony management.

Alumni Engagement

Build lifelong relationships through alumni communication, networking, fundraising, and career engagement.

01

Every Student. Every Milestone.

Student Lifecycle unifies every stage of the academic journey within a single, integrated platform. From admissions and registration to student services, research, graduation, and alumni engagement, it streamlines administration while connecting departments through shared information and automated workflows. The result is a more efficient institution, a better student experience, and greater visibility into student success.

Financial Management

Financial confidence begins with connected information, complete visibility, and decisions backed by real-time insight.

Financial Confidence. Institutional Control.

Financial Management brings together every aspect of institutional finance into a single, integrated platform. By automating financial processes, improving visibility, and delivering real-time reporting, institutions strengthen governance, reduce administrative effort, and make confident financial decisions backed by accurate data.

KEY CAPABILITIES

Budgeting & Forecasting

Plan and manage institutional budgets with greater confidence.

General Ledger

Maintain accurate financial records through integrated accounting.

Financial Reporting

Generate executive dashboards and regulatory-ready reports.

Accounts Payable & Receivable

Automate invoicing, payments, receipts, and reconciliations.

Cash Flow Management

Monitor income, expenditure, and financial performance in real time.

Procurement Integration

Connect purchasing activities directly to financial operations.

02

Asset & Facilities Management

Well-managed campuses don't happen by chance - they're built on connected assets, efficient operations, and proactive planning.

Smarter Campuses. Better Experiences.

Asset, Facilities & Infrastructure Management provides complete visibility into your institution's physical environment. From asset lifecycle management and preventative maintenance to facilities planning and resource utilisation, the module helps institutions operate more efficiently while creating better learning environments for students and staff.

KEY CAPABILITIES

Asset Management

Track institutional assets throughout their entire lifecycle.

Facilities Management

Manage buildings, venues, and campus resources efficiently.

Maintenance Planning

Schedule preventative maintenance and work orders.

Infrastructure Monitoring

Monitor campus infrastructure and operational performance.

Space Optimisation

Maximise the use of teaching and administrative facilities.

Service Requests

Capture, prioritise, and resolve maintenance requests quickly.

The most successful institutions
aren't defined by technology, but
by what technology enables.

Supply Chain Management

Procurement Without Complexity.

Supply Chain Management streamlines the procurement lifecycle from requisition through to supplier management and purchasing. Automated workflows reduce delays, improve transparency, and strengthen financial control while ensuring compliance with institutional procurement policies.

Procurement becomes a strategic advantage when every purchase, supplier, and approval is connected.

04

KEY CAPABILITIES

Procurement

Manage purchasing from requisition to approval.

Supplier Management

Maintain supplier records, contracts, and performance.

Inventory Control

Track stock availability and inventory movement.

Contract Management

Centralise supplier agreements and renewals.

Approval Workflows

Automate purchasing approvals and governance.

Procurement Reporting

Monitor spending, suppliers, and purchasing trends.

Human Resources Management

Empowering Your Greatest Asset.

Human Resources Management centralises recruitment, onboarding, payroll, leave management, performance, and employee development within a single platform. By automating routine HR processes and providing valuable workforce insights, institutions can focus on building engaged, high-performing teams.

KEY CAPABILITIES

Recruitment

Manage hiring from vacancy to appointment.

Payroll

Process salaries accurately and efficiently.

Leave Management

Simplify leave requests and approvals.

Performance Management

Support employee growth through continuous evaluation.

Training & Development

Manage learning, skills, and professional development.

Workforce Analytics

Gain valuable insights into organisational performance.

Exceptional institutions are built by exceptional people - and empowered by the right tools.

05

Great institutions don't just respond to change - they plan for it, govern with confidence, and manage risk with clarity.

KEY CAPABILITIES

Strategic Planning

Define objectives and monitor institutional performance.

Governance

Manage policies, committees, and organisational oversight.

Risk Management

Identify, assess, and mitigate institutional risks.

Compliance

Monitor regulatory and policy compliance.

Audit Management

Track audits, findings, and corrective actions.

Legal Services

Manage contracts, legal matters, and obligations.

Governance, Risk & Compliance Management

Strategy with Confidence.

Governance, Risk & Compliance brings together strategic planning, institutional governance, compliance monitoring, risk management, audits, and legal services within a single solution. Leadership teams gain greater visibility into organisational performance while ensuring regulatory compliance and supporting confident, data-driven decision-making.

06

Customer Relationship Management

Relationships That Last.

Customer Relationship Management provides a complete view of every stakeholder interaction across the institution. By centralising communications, enquiries, fundraising, partnerships, and engagement activities, institutions deliver more personalised experiences while strengthening relationships that extend well beyond graduation.

Every interaction is an opportunity to strengthen relationships that shape the future of your institution.

07

KEY CAPABILITIES

Stakeholder Engagement

Manage relationships across every touchpoint.

Communication

Coordinate personalised communication campaigns.

Enquiry Management

Track enquiries and service requests efficiently.

Fundraising

Support donor engagement and fundraising initiatives.

Alumni Relations

Build lifelong connections with graduates.

Partnership Management

Strengthen relationships with industry and strategic partners.

The Outcomes that matter

PSET brings every part of your institution together in one intelligent ecosystem - empowering you to achieve more for your students, your staff, and your future.

Improve student success

Deliver seamless, connected experiences from enrollment to graduation.

Make better decisions

Turn institutional data into actionable insight.

Increase operational efficiency

Reduce manual work through automation and integration.

Strengthen Governance

Stay compliant with confidence and complete visibility.

Build stronger relationships

Connect students, staff, alumni, and partners on one platform.

Future-proof your institution

Adopt technology designed to evolve with higher education.

**Built for the
modern institution.**
Ready for what's next.

“

*We built PSET for the modern institution.
One where technology removes barriers
instead of creating them, allowing data,
decisions, and outcomes to flow seamlessly
across every part of the organisation.*
