WHY PSET?

We built PSET for the modern institution. One where technology removes barriers instead of creating them, allowing data, decisions, and outcomes to flow seamlessly across every part of the organisation.

Built for What's Next

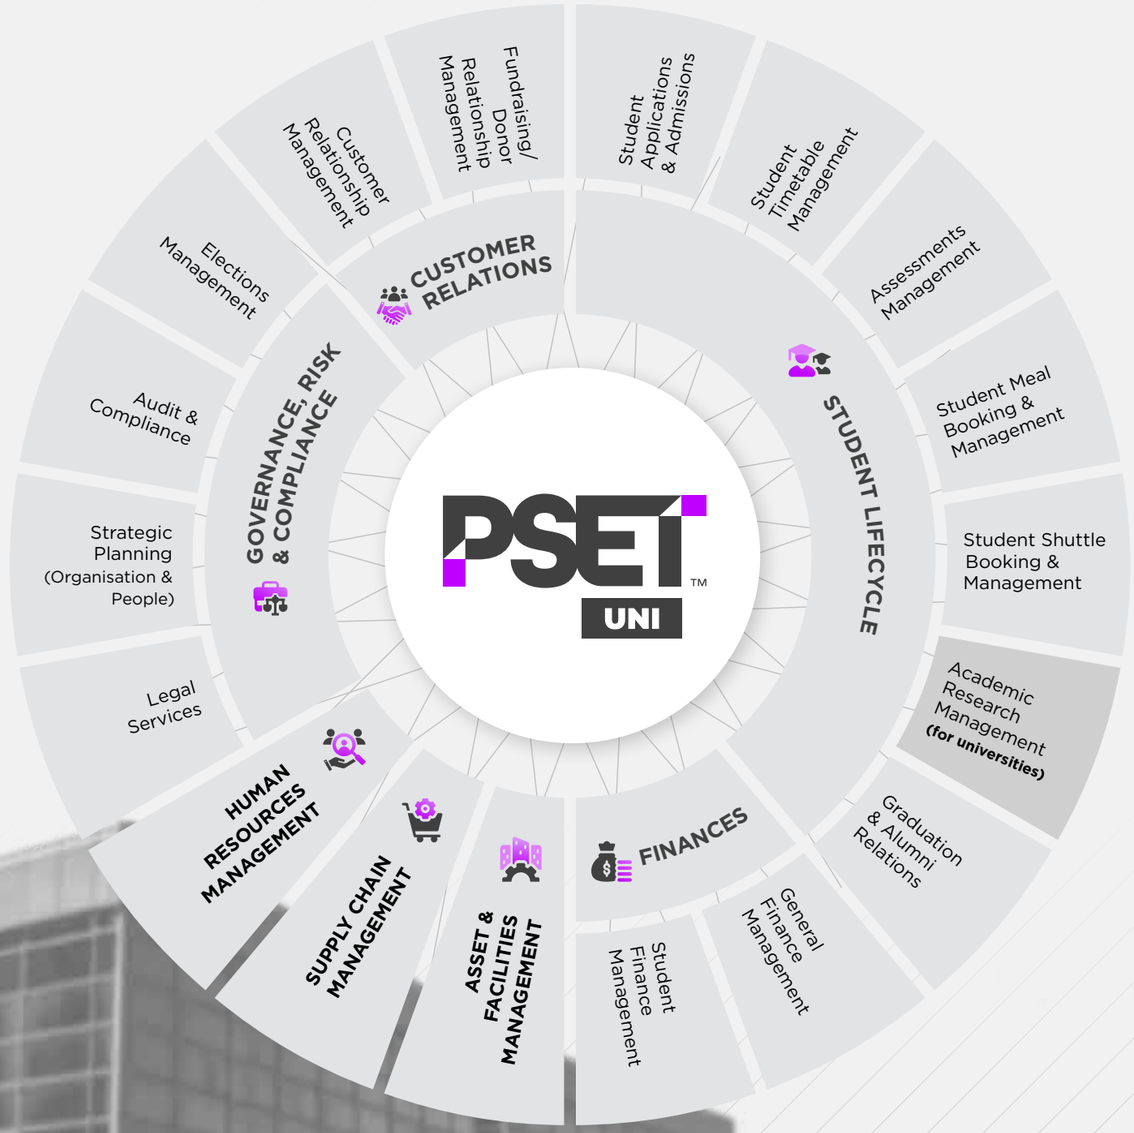

PSET UNI and PSET TVET are built on the same intelligent ecosystem, connecting institutions through one unified platform designed for both academic and vocational education.

- **INTEGRATED ECOSYSTEM**
  Connect NSFAS and national funders through one integrated platform.
- **AI FIRST BY DESIGN**
  Embedded AI automates processes and supports smarter decision-making.
- **DECISIONS-DRIVEN DATA**
  Access real-time insights with powerful dashboards and reporting.
- **BUILT BY SECTOR EXPERTS**
  Developed by experts with decades of higher education experience.

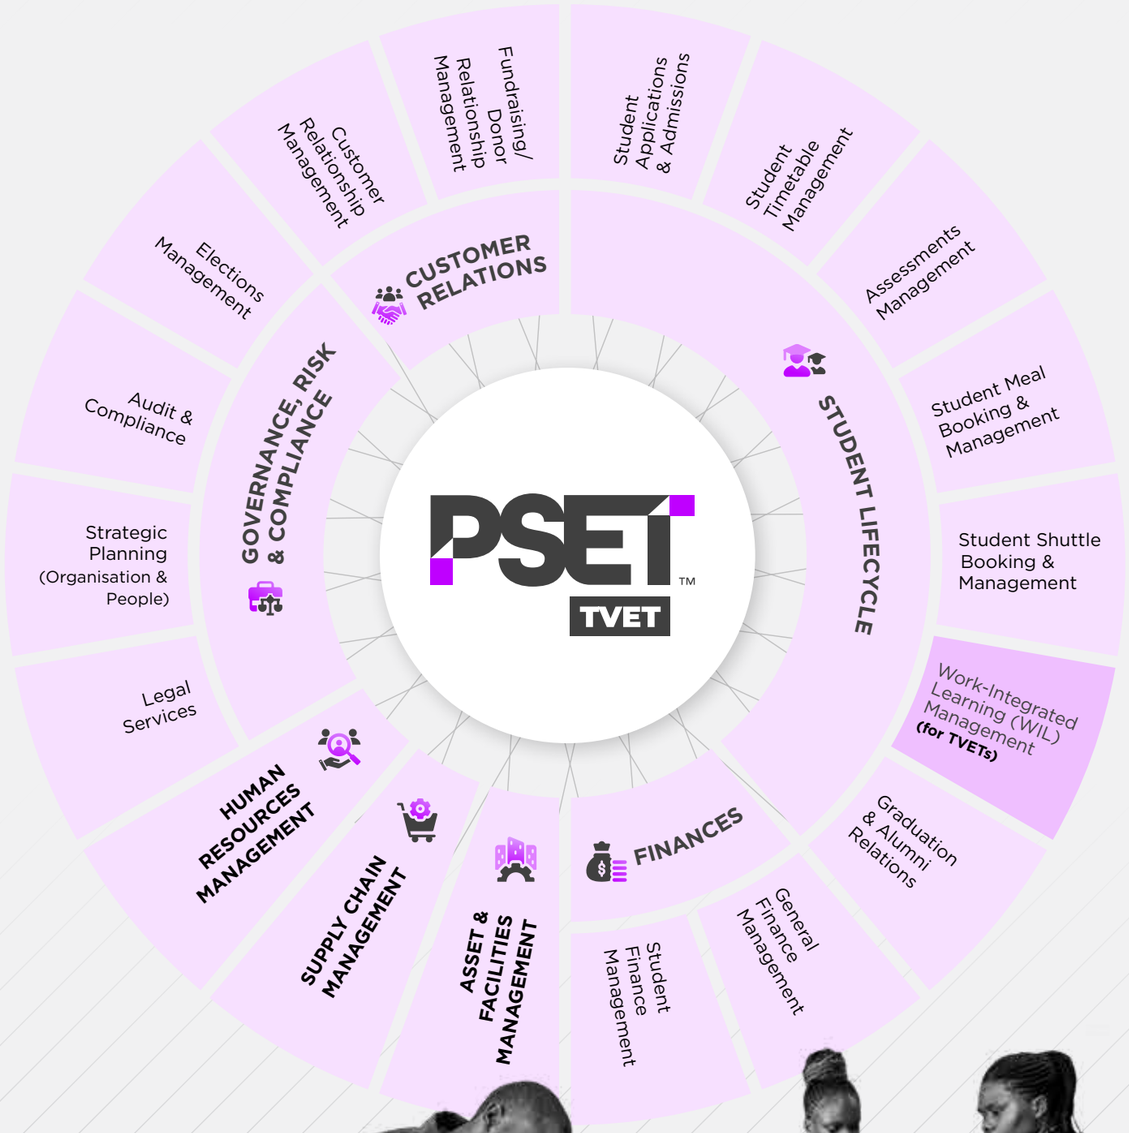

PURPOSE BUILT FOR
UNIVERSITIES

Built for universities that need to manage complex academic, research and institutional operations in one place. PSET UNI connects administration, postgraduate management, research, planning and governance to help teams work more efficiently.

PURPOSE BUILT FOR
TVET COLLEGES

Streamlined ERP for TVET colleges focused on teaching excellence, student success and industry relevance. PSET TVET brings the day-to-day needs of colleges into one connected platform, helping institutions stay organised and focused on student success.

PSET UNI™

Universities

Built for complex academic and research operations

Designed for universities that require advanced academic administration, postgraduate management, research, governance, planning and enterprise-wide integration.

Built Around Essentials

- Undergraduate and postgraduate administration
- Research and HEMIS management
- Institutional planning and governance
- Enterprise integrations and analytics

CORE CAPABILITIES

ACADEMIC ADMINISTRATION
Manage applications, admissions, registrations, programmes, curricula and academic records through a connected academic environment. PSET provides institutions with greater visibility across the student lifecycle while helping academic and administrative teams work from consistent, accessible information.

POSTGRADUATE & RESEARCH
Manage postgraduate students, research projects, outputs and supervisor milestones within a structured environment. PSET brings postgraduate and research information together, providing greater visibility of progress and helping institutions coordinate research activities more effectively.

PLANNING & PERFORMANCE
Support strategic planning and institutional performance with access to connected information across the university. PSET helps institutions track key performance areas, monitor progress and support evidence-based planning and decision-making.

GOVERNANCE & REPORTING
Bring governance, risk, compliance and reporting processes together in a connected environment. PSET helps institutions maintain visibility across key governance activities while simplifying access to the information required for reporting, oversight and informed decision-making.

PSET™ TVET

TVET Colleges

Built for technical and vocational education and student success

Designed for TVET colleges that need streamlined administration, workplace learning, multi-campus operations and simplified, industry-standard compliance reporting.

Built Around Essentials

- NC(V), NATED & Occupational Programme Management
- Teaching & Learning Coordination
- Work-Integrated Learning (WIL)
- DHET and NSFAS reporting

CORE CAPABILITIES

TEACHING & LEARNING OPERATIONS

Manage timetables, classes, lecturers and assessments across programmes and campuses. PSET provides a central view of teaching and learning operations, helping colleges coordinate resources and keep academic activities aligned.

STUDENT LIFECYCLE

Manage recruitment, applications, registration and ongoing student support through a connected lifecycle. PSET gives colleges greater visibility of student activity and progress, helping teams coordinate services and support students from enrolment through to completion.

STUDENT SUPPORT & SUCCESS

Give student support teams the information they need to identify students who may require additional assistance. PSET supports case management and targeted interventions, helping colleges respond proactively to student needs and promote successful progression.

WORKPLACE & INDUSTRY READINESS

Manage workplace learning, placements and industry partnerships as part of the student journey. PSET provides greater visibility of WIL activities and industry engagement, helping colleges coordinate opportunities and maintain oversight of workplace readiness.

Student Lifecycle

01

Every Student. Every Milestone.

Student Lifecycle unifies every stage of the academic journey within a single, integrated platform. From admissions and registration to student services, research, graduation and alumni engagement, it connects departments through shared information and streamlined workflows.

KEY CAPABILITIES

01 **ADMISSIONS & REGISTRATION**
Manage the complete admissions and registration process from application through enrolment. Centralise applicant and student information, streamline administrative workflows and provide staff with a consistent view of applications, admissions decisions, registrations and student records.

02 **ACADEMIC ADMINISTRATION**
Coordinate the academic journey across programmes, modules, assessments and progression. Keep academic information connected and accessible while giving academic and administrative teams the tools they need to manage student records and monitor progress throughout the academic lifecycle.

03 **STUDENT FINANCE**
Bring student financial information into the wider student journey. Manage billing, payments, sponsorships, bursaries and student accounts while giving administrators and students clearer visibility of financial activity and outstanding obligations.

04 **CAMPUS SERVICES**
Connect the everyday services that support the student experience. From timetabling and shuttle bookings to meal management and student support services, institutions can coordinate essential campus activities through a more integrated and accessible environment.

05 **RESEARCH & GRADUATION**
Support the academic journey beyond standard undergraduate administration. Manage research-related activities while coordinating graduation planning, eligibility and ceremony processes, ensuring important milestones are managed with greater visibility and less administrative complexity.

06 **ALUMNI ENGAGEMENT**
Continue the relationship beyond graduation by maintaining meaningful connections with alumni. Support communication, networking, fundraising and career engagement while building a connected record of alumni relationships and activities.

When every stage of the student journey is connected, every student has a greater opportunity to succeed.

Financial Management

Financial confidence begins with connected information, complete visibility, and decisions backed by real-time insight.

Financial Confidence. Institutional Control.

Financial Management brings together every aspect of institutional finance into a single, integrated platform. By automating financial processes, improving visibility, and delivering real-time reporting, institutions strengthen governance, reduce administrative effort, and make confident financial decisions backed by accurate data.

KEY CAPABILITIES

01 BUDGETING & FORECASTING

Plan institutional budgets with greater confidence by bringing budgeting and financial information together. Monitor allocations, expenditure and performance while using available financial information to support forecasting and forward-looking planning.

02 GENERAL LEDGER

Maintain a consistent and accurate financial record across institutional operations. Integrated accounting processes provide a central view of financial transactions and support stronger financial control, reconciliation and reporting.

03 FINANCIAL REPORTING

Transform financial information into clear, actionable insight through executive dashboards and comprehensive reporting. Provide leadership and finance teams with visibility into institutional performance while supporting regulatory and management reporting requirements.

04 ACCOUNTS PAYABLE & RECEIVABLE

Streamline the management of money flowing into and out of the institution. Automate invoicing, payments, receipts and reconciliations while providing greater visibility of outstanding balances and financial activity.

05 CASH FLOW MANAGEMENT

Monitor institutional income, expenditure and cash position with greater visibility. Access timely financial information to support day-to-day management while helping finance teams identify trends and plan around future requirements.

06 PROCUREMENT INTEGRATION

Connect procurement activity directly with institutional financial processes. Link purchasing, approvals and expenditure to financial operations to improve transparency, maintain control and ensure procurement activity remains aligned with available budgets.

02

Asset & Facilities Management

Well-managed campuses don't happen by chance - they're built on connected assets, efficient operations, and proactive planning.

Smarter Campuses. Better Experiences.

Asset, Facilities & Infrastructure Management provides complete visibility into your institution's physical environment. From asset lifecycle management and preventative maintenance to facilities planning and resource utilisation, the module helps institutions operate more efficiently while creating better learning environments for students and staff.

KEY CAPABILITIES

01

ASSET MANAGEMENT

Track institutional assets throughout their complete lifecycle, from acquisition and deployment through ongoing use and maintenance. Maintain visibility of asset information, location and status to support accountability and more effective asset management.

02

FACILITIES MANAGEMENT

Manage buildings, venues and campus resources through a centralised facilities environment. Maintain visibility of facilities, their use and associated operational requirements while helping teams coordinate resources across the institution.

03

MAINTENANCE PLANNING

Move from reactive maintenance towards a more structured and proactive approach. Schedule preventative maintenance, manage work orders and coordinate maintenance activities to help protect institutional assets and maintain operational continuity.

04

INFRASTRUCTURE MONITORING

Monitor key campus infrastructure and operational performance to maintain greater awareness of the physical environment. Identify issues and emerging requirements earlier, supporting more proactive management and planning.

05

SPACE OPTIMISATION

Make better use of teaching, administrative and shared facilities through improved visibility of available space and utilisation. Support campus planning by understanding how institutional spaces are allocated and used.

06

SERVICE REQUESTS

Provide a structured way to capture, prioritise and manage maintenance and facilities requests. Track requests from submission through resolution, giving teams greater visibility of outstanding work and service performance.

The most successful institutions aren't defined by technology, but by what technology enables.

Supply Chain Management

Procurement becomes a strategic advantage when every purchase, supplier, and approval is connected.

Procurement Without Complexity.

Supply Chain Management streamlines the procurement lifecycle from requisition through to supplier management and purchasing. Automated workflows reduce delays, improve transparency, and strengthen financial control while ensuring compliance with institutional procurement policies.

KEY CAPABILITIES

01

PROCUREMENT

Manage purchasing activity from initial requisition through to approval and order. Standardise procurement processes, improve visibility of purchasing activity and give stakeholders a clearer view of where each request sits within the procurement lifecycle.

02

SUPPLIER MANAGEMENT

Centralise supplier information, relationships and performance data in one environment. Maintain up-to-date supplier records and improve visibility of supplier activity, contracts and performance across institutional procurement.

03

INVENTORY CONTROL

Maintain greater visibility over stock availability, inventory levels and movement. Support more effective resource planning by providing teams with accurate information about what is available, where it is located and how it is being used.

04

CONTRACT MANAGEMENT

Centralise supplier agreements, renewal schedules, and contractual obligations in a structured environment. Improved oversight reduces risk, supports compliance, and ensures critical milestones and commitments are managed effectively throughout contract lifecycles.

05

APPROVAL WORKFLOWS

Automate procurement approvals based on predefined rules, roles, and governance requirements. Digital workflows improve transparency, accelerate decision-making, and ensure every purchasing activity follows established institutional controls and accountability measures.

06

PROCUREMENT REPORTING

Monitor procurement spending, supplier activity, purchasing trends, and operational performance through detailed reporting tools. Actionable insights help institutions optimise costs, strengthen governance, and improve strategic procurement planning.

Human Resources Management

Exceptional institutions are built by exceptional people - and empowered by the right tools.

Empowering Your Greatest Asset.

Human Resources Management centralises recruitment, onboarding, payroll, leave management, performance, and employee development within a single platform. By automating routine HR processes and providing valuable workforce insights, institutions can focus on building engaged, high-performing teams.

KEY CAPABILITIES

01 RECRUITMENT
Manage the recruitment process from vacancy creation and candidate sourcing to interviewing and appointment. Streamlined workflows improve hiring efficiency, enhance candidate experiences, and help institutions attract and retain top talent.

02 LEAVE MANAGEMENT
Simplify leave applications, approvals, balances, and workforce planning through automated processes. Improved visibility supports continuity while providing employees and managers with a transparent and efficient leave experience.

03 PAYROLL
Process salaries, deductions, allowances, and statutory obligations accurately and efficiently within an integrated system. Automated payroll management improves compliance, reduces administrative effort, and ensures employees are paid correctly and on time.

04 WORKFORCE ANALYTICS
Access meaningful workforce insights through reporting and analytics that support informed HR decision-making. Institutions gain visibility into employee trends, performance, retention, and resource planning to strengthen organisational effectiveness.

05 PERFORMANCE MANAGEMENT
Support employee growth and organisational performance through evaluations, goal setting, and feedback. Structured performance management helps align individual objectives with institutional priorities while encouraging professional development and accountability.

06 TRAINING & DEVELOPMENT
Manage employee learning, skills development, certifications, and professional growth initiatives through a centralised platform. Institutions can identify capability gaps, track progress, and support ongoing workforce development aligned with strategic objectives.

05

Great institutions plan for change, govern with confidence, and manage risk with clarity.

Governance, Risk & Compliance Management

Strategy with Confidence.

Governance, Risk & Compliance brings together strategic planning, institutional governance, compliance monitoring, risk management, audits, and legal services within a single solution. Leadership teams gain greater visibility into organisational performance while ensuring regulatory compliance and supporting confident, data-driven decision-making.

KEY CAPABILITIES

01 **STRATEGIC PLANNING**
Define institutional objectives, monitor performance indicators, and track progress against strategic priorities. Centralised planning tools improve alignment across departments, enhance accountability, and provide leadership with clear visibility into organisational outcomes.

02 **GOVERNANCE**
Manage policies, committees, approvals, and organisational oversight activities within a structured framework. Improved governance processes strengthen transparency, support regulatory requirements, and ensure decisions are documented and aligned with institutional goals.

03 **RISK MANAGEMENT**
Identify, assess, monitor, and mitigate risks across the institution using standardised methodologies. Enhanced visibility enables proactive decision-making, strengthens resilience, and supports effective management of operational, financial, and strategic risks.

04 **COMPLIANCE**
Monitor regulatory obligations, policy adherence, and compliance activities through integrated controls and reporting. Automated tracking helps reduce risk, improve accountability, and ensure institutional operations remain compliant with applicable requirements.

05 **AUDIT MANAGEMENT**
Plan, manage, and track audits, findings, recommendations, and corrective actions within a centralised environment. Improved oversight enhances accountability, supports governance objectives, and ensures audit outcomes are effectively addressed and monitored.

06 **LEGAL SERVICES**
Manage contracts, legal matters, obligations, and documentation through a structured platform. Centralised records improve visibility, reduce risk, and help institutions maintain compliance while ensuring legal activities are coordinated efficiently.

06

Customer Relationship Management

Every interaction is an opportunity to strengthen relationships that shape the future of your institution.

Relationships That Last.

Customer Relationship Management provides a complete view of every stakeholder interaction across the institution. By centralising communications, enquiries, fundraising, partnerships, and engagement activities, institutions deliver more personalised experiences while strengthening relationships that extend well beyond graduation.

07

KEY CAPABILITIES

01

STAKEHOLDER ENGAGEMENT

Manage relationships with students, alumni, donors, partners, and other stakeholders through a single platform. Comprehensive interaction histories support personalised engagement while strengthening communication and long-term relationship development.

02

COMMUNICATION

Coordinate personalised communication campaigns across multiple channels using centralised stakeholder information. Improved targeting and consistency enhance engagement, strengthen institutional relationships, and ensure relevant messages reach the right audiences.

03

ENQUIRY MANAGEMENT

Track, manage, and resolve enquiries, requests, and interactions efficiently through structured workflows. Improved responsiveness enhances service quality, increases stakeholder satisfaction, and ensures every engagement is monitored and addressed.

04

FUNDRAISING

Support donor engagement, campaign management, and fundraising activities through integrated planning and reporting tools. Enhanced visibility into contributions and relationships helps institutions build sustainable funding opportunities and long-term donor support.

05

ALUMNI RELATIONS

Develop meaningful, lifelong connections with graduates through communication, events, networking opportunities, and targeted engagement programmes. Strong alumni relationships contribute to institutional reputation, fundraising success, mentorship opportunities, and community growth.

06

PARTNERSHIP MANAGEMENT

Strengthen relationships with industry, government, and strategic partners through coordinated engagement and collaboration tools. Improved visibility supports partnership development, enhances mutual value creation, and enables institutions to manage stakeholder commitments effectively.

The Outcomes that matter

PSET brings every part of your institution together in one intelligent ecosystem - empowering you to achieve more for your students, your staff, and your future.

IMPROVE STUDENT SUCCESS

Deliver seamless, connected experiences from enrolment to graduation.

MAKE BETTER DECISIONS

Turn institutional data into actionable insight.

INCREASE OPERATIONAL EFFICIENCY

Reduce manual work through automation and integration.

STRENGTHEN GOVERNANCE

Stay compliant with confidence and complete visibility.

BUILD STRONGER RELATIONSHIPS

Connect students, staff, alumni, and partners on one platform.

FUTURE-PROOF YOUR INSTITUTION

Adopt technology designed to evolve with higher education.

Built for the modern institution. Ready for what's next.
